Yuzhe Yang | 阳雨哲

Email: yuzheyang@link.cuhk.edu.cn | Phone: +86 18310762536 | Homepage: tobyyang7.github.io

A Year 3 CSE student with a keen interest in deep learning. Currently exploring GCN, LLM, and NLP.

Education

School of Data Science | The Chinese University of Hong Kong, Shenzhen *Sep 2021 - May 2025*
B.Eng. in Computer Science and Engineering
Core Curriculums: Data Structure | Operating System | Computer Architecture | Machine Learning | Optimization | NLP

Skills

Programming Languages: Python | PyTorch | C++
Technologies: Git | VS Code | MATLAB | LaTeX| Linux | CLI
Languages: English (Fluent) | Mandarin (Native)

Work Experiences

China Telecom Beijing Research Institute *Jan 2024 - Mar 2024*
Remote Internship Beijing, China
- Analyze AI Large Model's trends, applications, and industry impact

Shenzhen Branch of China Telecom *Jan 2024 - Now*
Part-time Internship Shenzhen, China
- Time Series Analysis, Data Visualization
- GIS Data Analysis, Data Mining

Publication

FAST-CA: Fusion-based Adaptive Spatio-Temporal Learning with Coupled Attention for Airport Network Delay Propagation Prediction, Information Fusion, 2024, 107:102326 [online] *Aug 2023 - Nov 2023*
Undergraduate Research Assistant, advised by ***Prof. Jianfeng Mao*** SDS, CUHK(SZ)
- Refined the deep learning model for the prediction of airport network delays
- Implemented baseline models and measure the performance of the proposed model
- Spatio-temporal data analysis and illustration
- Deep Learning, Graph Neural Network, PyTorch, PyTorch Geometric

Research Experiences

Research in Continuous Spatio-Temporal Graph *Jan 2024 - Now*
Undergraduate Research Assistant SDS, CUHK(SZ)
- Implemented a conditional spatio-temporal graph model for traffic flow prediction
- Proposed a novel method to construct continuous graphs using Ordinary Differential Equations
- Time convolutional graph neural network

Deep Learning Approach for Early Predicting and Controlling Network Flow in SDN *Jan 2024 - Now*
Research Internship ICNLAB, PKU(SZ)
- Developed a novel network flow prediction method using a modified Informer architecture for Software-Defined Networks
- Designed and implemented a proactive congestion management strategy based on the predictions
- Conducted practical experiments in a simulated environment to validate the effectiveness of the proposed method
- Deep Learning, Time Series Analysis, PyTorch

Projects Experiences

Evaluation Model of Light Pollution by Multi-conditional AHP | MCM *Feb 2023*
- GIS-data analysis, Mathematical modeling
- Analyzed the level of light pollution in the area by population data, regional income data, etc.
- Explored the multifaceted impacts of light pollution on the region
- GeoPandas, Folium

1st and Future - Player Contact Detection Competition | Kaggle *Dec 2022 - Mar 2023*
- Employed advanced data preprocessing techniques to clean and integrate complex datasets, including video analysis and player tracking information, ensuring high-quality inputs for model training.
- Innovated in creating predictive features by analyzing player movements and interactions through statistical modeling and signal processing, enhancing model accuracy in detecting contacts.
- Utilized ensemble learning and fine-tuned deep learning models to achieve high precision in contact detection
- Bronze Medal

Game Theory Analysis of SEO Strategies: From Methods to Models *Oct 2023 - Dec 2023*
- Researched and implemented various Search Engine Optimization (SEO) strategies to improve website ranking
- Developed and validated a new ranking algorithm incorporating keyword frequency, traffic, and linkage
- Applied game theory principles to SEO, including simulation of an α-random walk and analysis of Nash Equilibrium
- Proposed a multi-stage strategy to handle the dynamic nature of SEO

AI-Based Flight Delay Insurance Recommendation System *Jun 2024 - Now*
- Predict flight delays and recommend personalized travel insurance, in order to improve customer satisfaction
- Utilized deep learning, NLP, and sentiment analysis for accurate delay predictions and customer sentiment assessment

Machine Learning Project *(in class)* *Feb 2023 – May 2023*
- Data Analysis, Data Visualization
- Python: numpy, pandas, matplotlib, sklearn, scipy, etc
- Implemented model: Linear Regression, SVM, Decision Tree, K-Means, PCA, etc.
